

# Verified Impact

High integrity verified data backed by the scalability of, and trust in, the FSC global system.

## How it works

Enabling investment from sponsors, including businesses, financial institutions and governments, **in projects that monitor, maintain and improve ecosystem services in FSC-certified forests.**

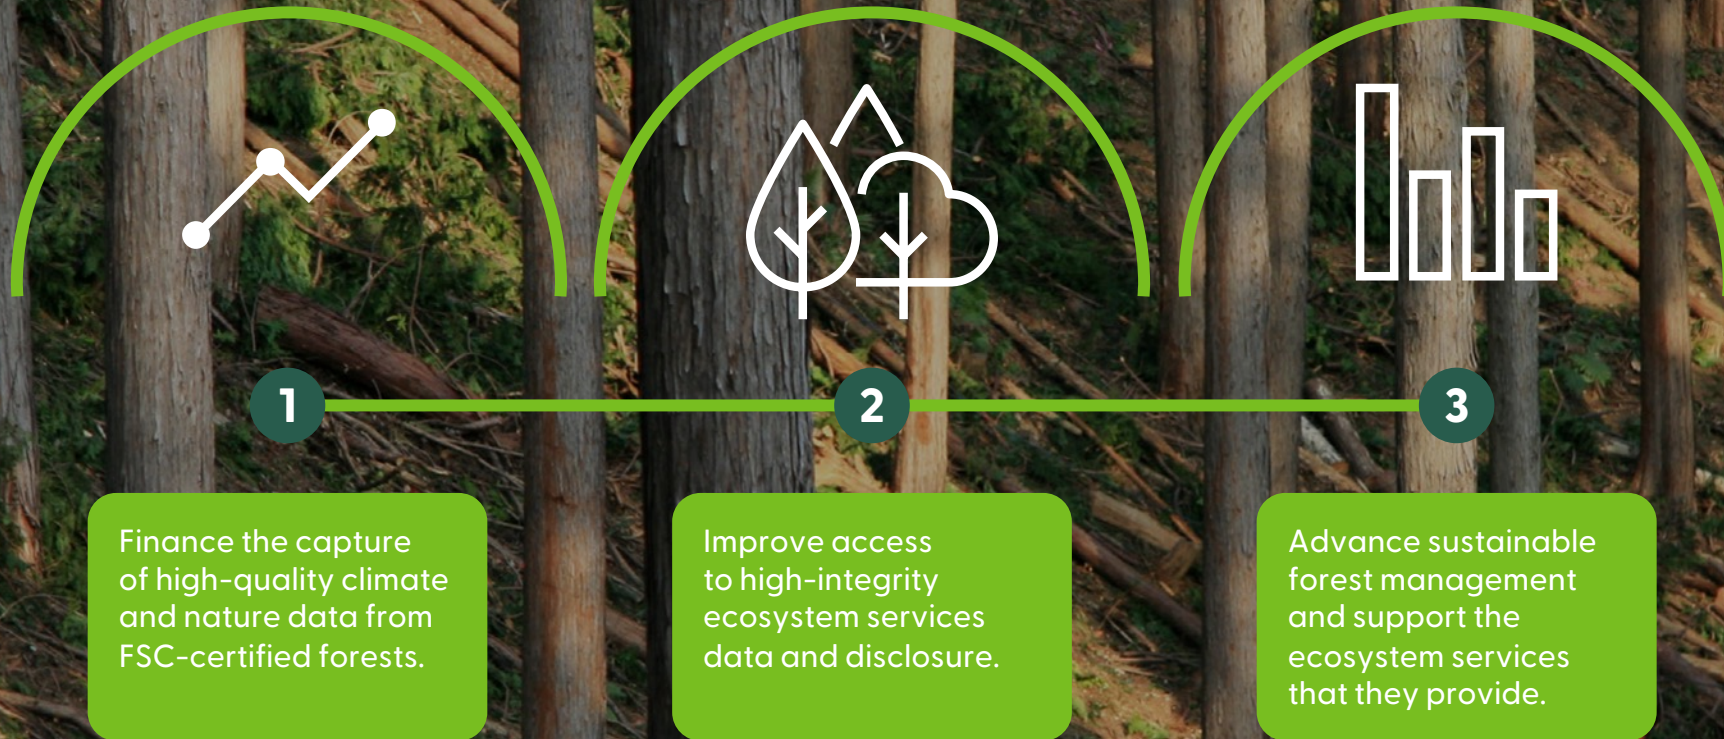

Helping harness the full force of forests' positive power as a scalable, long-term solution to the climate and biodiversity crises.

# A collaborative approach

Working with businesses, governments and forest managers, we are taking a whole value chain approach to:

# Our areas of focus

Our updated approach to monitoring, conservation and improvement of ecosystem services in FSC-certified forests is focused on six categories:

**Carbon**

**Biodiversity**

**Soil**

**Water**

**Recreation**

**Cultural services**

The work on Cultural services is under development.
